

HOLIDAY SAFETY TIPS

CHRISTMAS TREES

For a cut tree, choose one with fresh green needles and cut 2 inches off the base of the trunk before placing in the tree stand.

Place the tree 3 feet from any heat sources such as candles.

Add water DAILY to the tree stand.

Check lights and replace any strings having worn or broken cords or loose bulb connections, because electrical problems cause 25% of tree fires.

Never use lit candles on trees.

Always turn tree lights off before going to bed.
